

Satya Sai Tharun Jekkamsetti

Machine Learning Analyst and Generative AI Engineer with hands-on experience designing and deploying scalable AI-driven solutions using Python, Java, NLP, and cloud platforms (AWS, Azure). Strong foundation in LLMs, prompt engineering, ML pipelines, API integrations, and data-driven decision systems. Proven ability to translate complex business problems into secure, ethical, and production-ready AI solutions through Agile collaboration and full-stack engineering expertise.

WORK EXPERIENCE

Gradious Technologies

Trainee - Machine learning with Gen AI

Sep 2025 - present

- Developed end-to-end Machine Learning pipelines using Python, including data preprocessing, feature engineering, model training, and evaluation with Scikit-learn.
- Built and optimized Deep Learning models (ANNs) using PyTorch/TensorFlow, applying forward & backward propagation and tuning hyperparameters for improved accuracy.
- Implemented NLP workflows for text preprocessing, sentiment analysis, and document classification using TF-IDF and tokenization techniques.
- Deployed ML models as REST APIs using FastAPI, enabling real-time predictions and integrating authentication and validation logic.

MITHYA IT SERVICES (OPC) PRIVATE LIMITED - Hyderabad, Telangana

Intern - Trainee Frontend Developer

Oct 2024 - Jan 2025

- Developed a responsive appointment alerts platform using Next.js and ShadCN, implementing JWT-based authentication and role-based access control (RBAC).
- Enhanced UI/UX and frontend performance through code splitting and lazy loading, achieving 30% higher user engagement and 25% faster load times.
- Designed and integrated RESTful APIs in collaboration with backend teams for appointments, user profiles, and notifications.
- Optimized client-side architecture for scalability, maintainability, and cross-device compatibility.

PROJECT

Financial Lending Risk Prediction System (Machine Learning Project)

Jan 2026

- Built an end-to-end loan approval prediction system using 6 machine learning models (Logistic Regression, Random Forest, XGBoost, SVM, KNN, Naive Bayes) with performance benchmarking.
- Performed advanced data preprocessing and feature engineering, including one-hot encoding, power transformation, and SMOTE to handle class imbalance.
- Implemented an ensemble voting classifier to improve predictive stability and model robustness.
- Evaluated models using accuracy, confusion matrix, classification report, ROC-AUC, and ROC curves, generating detailed visual insights and reports.

EDUCATION

Malla Reddy Institute of Engineering and Technology - Hyderabad, Telangana

B.Tech in CSE- Data Science

Jul 2022 - May 2025

CGPA: 7.34

Vallurupalli Nageswara Rao Vignana Jyothi Institute of Engineering and Technology

Diploma in Electrical and Electronics Engineering

Jun 2019 - Jun 2022

CGPA: 6.56

CERTIFICATION

AI ML Projects Course - Simplilearn, Generative AI Models for Beginners - Simplilearn
Python Foundation Certification - Infosys, Django Web Framework - Meta
Introduction to Front End development - Simplilearn, Python for Beginners - Simplilearn

SKILLS

- Programming Languages: Python, JavaScript, JAVA
- Machine Learning & AI: Machine Learning, Deep Learning, NLP, Generative AI
- ML Libraries: Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow
- Front-End Technologies: Next.js, React, ShadCN, React Router DOM, TailwindCSS, CSS
- Back-End Technologies: Django, FastAPI
- Version Control: GitHub
